

## Scientific Visit to The University of Texas, MD Anderson Cancer Center, Dept. of Nuclear Medicine.

I am Nguyen Xuan Canh from Vietnam. I have worked in Department of Nuclear Medicine, Choray Hospital in Ho Chi Minh, Vietnam since 1998 as a Nuclear Medicine Physician. I perform radiopharmaceutical therapy (e.g. for thyroid diseases, liver cancer, bone pain palliation) and scintigraphy (bone, renal, thyroid, brain and myocardial perfusion). Since 2009, I have specialized in interpretation of PET/CT imaging. I have worked as a Chair of the Department of Nuclear Medicine in Choray Hospital since Sept 2015.

I was delighted to be awarded a scientific visit to The University of Texas, MD Anderson Cancer Center, Dept. of Nuclear Medicine from Sept 8th to 14th, 2015 under the support of the International Atomic Energy Agency.

In here, I observed activity of Nuclear Medicine including radiopharmaceutical therapy and diagnostic imaging of planar, SPECT/CT and PET/CT as well as participated in the thyroid conference. This scientific visit is really helpful for me to see the achievement of Nuclear Medicine at the MD Anderson Cancer Center and this will provide me more energy to work hard to further the development of Nuclear Medicine in my country.
