Gary Dyck
International Atomic Energy Agency

Joe Braun, Roy Lindley, Stephen Koenick, Jongile Majola

Time For A Break

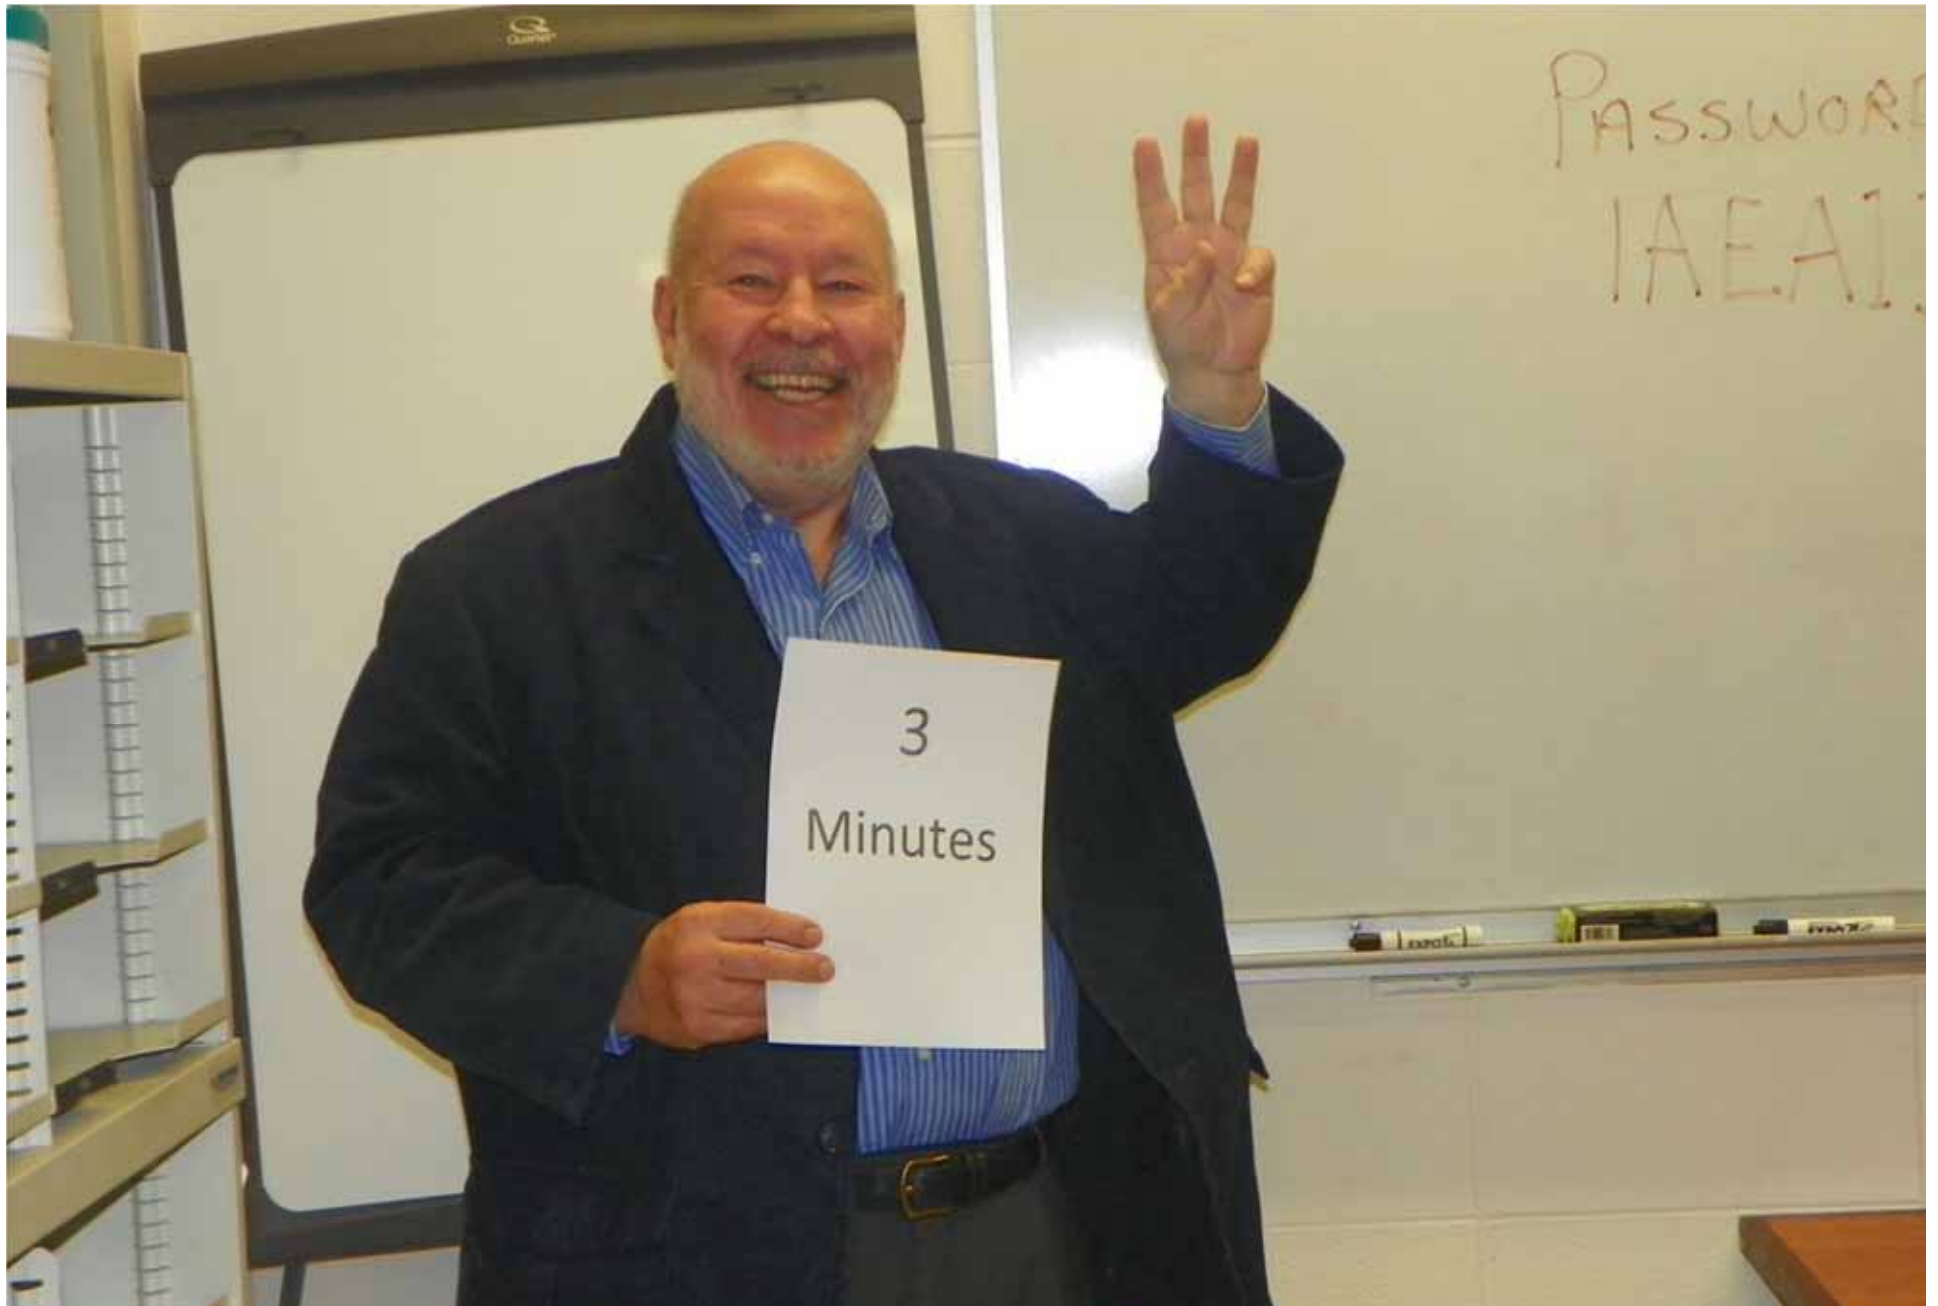

A photograph of a lecture hall. The foreground shows rows of wooden desks and chairs, with the desks having a light-colored top and a dark metal frame. The chairs have a light-colored seat and a dark metal frame. The background is a brick wall. The text "Back To The Lecture Hall" is overlaid on the right side of the image in a white, bold, sans-serif font.

Success

Advantages	Challenges
• Clearer to design & implementation	• Expensive
• Not time dependent	• National level
• Under 5 years to implement learning	• Management institution
	• Lack of resources
	• Equipment availability
	• Political, social, physical consequences

A Project risks: design, financing, social acceptance, recycling, procurement, impact, development, etc.

TRIP TO BRAIDWOOD

SAIDWOOD GENERATING STATION
Following to be the industry's best
Power Assets

By 2010, Saidwood Generating Station will be the industry's best Power Asset.

Key Performance Indicators (KPIs) include:

- Plant Management
- Equipment Reliability

SER 3-05 Ops Fundamentals

1. Monitoring Plant & conditions and Indications & Alarms
2. Incorporating Plant Excursions Predicts
3. Establishing a Disturbance & Contingency Approach to Plant Operations
4. Working Effectively as a Team
5. Having a Solid Understanding of Plant Design and System Interrelationships
