Categorization of Nuclear Material

Categorization should be based on the potential use of the material being used for a nuclear explosive device, which itself depends on its form of material, e.g. plutonium, uranium, isotopic composition, its amount of fissile isotopes, physical and chemical form, degree of purification, container form, and quantity.

A celebratory graphic featuring several white-frosted cupcakes with colorful sprinkles and a pink flower-shaped decoration. The cupcakes are arranged around a central white rectangular area. This area is framed by a gold star garland and a gold ribbon. The background is a light purple and white patterned paper.
