

Kirsten F. Laurin-Kovitz, PhD
Program Manager, Nonproliferation and National Security
Nuclear Engineering Division
Argonne National Laboratory

Dr. Kirsten Laurin-Kovitz has more than fifteen years experience in nuclear reactor analysis, nuclear nonproliferation, and nuclear material safeguards. Her experience ranges from developing computational methods to performing sensitivity analysis for reactor design to supporting nonproliferation program implementation in Ukraine, the Caucasus (Armenia, Azerbaijan, and Georgia), and South America (Argentina, Brazil, Chile and Peru). Currently, Dr. Laurin-Kovitz leads the Technical Nonproliferation Policy Support Program, managing a team which combines expertise in science and engineering with specialized knowledge of nonproliferation policies and international affairs to provide technical advisory services and conduct outreach for policy implementation such as training to export control enforcement personnel on strategic WMD-related commodities and to nuclear authorities on implementation of the additional protocol.

Dr. Laurin-Kovitz received her B.S. from the University of Illinois and her M.S. and Ph.D. from Northwestern University.
