

CHARLES T. ROCHE

Dr. Charles Roche received a Ph.D. in Nuclear Chemistry from the University of Maryland. He has held various technical and management positions at Argonne National Laboratory including serving as manager of the National Security & Nonproliferation Department in the Nuclear Engineering Division. Dr. Roche has over thirty five years experience working on technologies in nuclear materials safeguards and radiation detection systems. Most recently he has worked for DOE on upgrading safeguards & security systems at nuclear sites in the former Soviet Union (FSU). He currently works with the DOE MC&A Measurements project to assist the Russians to develop the infrastructure for sustainable nuclear material control & accountability (MC&A) systems.
