Scope of Present Duties:

As a Section Manager, manages two Sections in the Environmental Science Division; the Radiological Health Risk Section and the Environmental Health Risk Section. Serving as the Program Manager for Argonne's Technical Support Program to the U.S. Nuclear Regulatory Commission (NRC) for licensing of new reactors and license renewals of current reactors. Manages several projects related to construction and operation of new reactors and a new uranium enrichment facility.

Most Relevant Past Experience:

Management of projects and programs related to licensing of new reactors and fuel cycle facilities. Management of projects related to license renewals of current reactors. Project Team Lead for several environmental impact statement projects, including one for the construction and operation of a new uranium enrichment plant in North Carolina, and two new depleted uranium hexafluoride conversion plants in Ohio and Kentucky.

Educational Background:

Ph.D. in Nuclear Engineering from the University of Wisconsin-Madison.
