**Paul Murphy**, a senior attorney in Milbank's Global Project Finance Group, is one of the nuclear industry's most experienced lawyers in legal and policy matters as well as international regulatory and treaty frameworks and issues regarding nuclear liability. His international work centers on strategies for creating viable nuclear power programs, and on the identification and mitigation of associated risks. Mr. Murphy is recognized as an expert in the development and financing of nuclear power programs by the International Atomic Energy Agency (IAEA), the OECD's Nuclear Energy Agency (NEA) and the US government. Recently, Mr. Murphy was selected by the IAEA to serve as a member of its Technical Cooperation Program team, which assists member states in developing civilian nuclear power programs. Mr. Murphy has served as a designated expert, chairman, and author at several special meetings and for multiple working groups of the IAEA. He continues to work with the IAEA in a number of key areas, including a current revision of the IAEA's *Handbook on Nuclear Law* and as lead author for a new report to be developed over the next year, entitled, "*Alternative Contracting and Ownership Policies for Nuclear Power Plants*".

Mr. Murphy was recently selected by the US Secretary of Commerce to serve on the Civilian Nuclear Trade Advisory Committee, an advisory panel of key leaders within the US nuclear industry. In addition, Mr. Murphy recently served as the US Government's sole representative on an NEA working group on "*Financing of Nuclear Power Plants*". Mr. Murphy has also worked with the Nuclear Energy Institute, the US State Department, the US Mission to the OECD, and the Export-Import Bank of the United States on revisions to the OECD's Guidelines for the financing of nuclear power projects by Export Credit Agencies. He has twice delivered presentations to a US government interagency working group ("*Developing Countries Interested in Nuclear Energy*") on financing of nuclear power for the developing world.

Recently, Mr. Murphy served as a faculty member for the "*Training Course on Nuclear Power Infrastructure Programs and Related Projects in Emerging Nuclear States*", held on behalf of the US State Department and the IAEA in 2009. Mr. Murphy was the lead instructor for the segments on financing and the bidding / evaluation process for nuclear power projects. The course was attended by representatives of over 20 foreign governments.

Prior to joining Milbank, he served as Senior Counsel for Bechtel Power Corporation, supporting both the Nuclear and Fossil business lines as a transactional attorney. He was also Bechtel's primary representative to the Contractors International Group on Nuclear Liability. Mr. Murphy's prior experience with Bechtel spanned legal issues associated with bid evaluations, business development, proposal submittals, contract negotiations, procurement, and project execution. Mr. Murphy has an in-depth understanding of the various international treaty regimes, as well as national legal structures and regulatory regimes, that address the subject of nuclear liability.

Mr. Murphy is a graduate of Princeton University's Woodrow Wilson School for Public and International Affairs and a graduate of Harvard Law School.
