

INSTRUCTIONS FOR COUNTRY PRESENTATIONS

In order to familiarize the participants of the IAEA/ANL Training Course on Essential Elements of Nuclear Security on the various ways that different countries are addressing issues of nuclear security we ask that each country present a brief talk (10 min.) on their nuclear regulatory organization. This talk is intended to be informal so that your colleagues receive additional ideas that may be helpful as they consider these issues. The talk may include a PowerPoint presentation if desired. For countries having more than one participant please choose one representative to speak for your country. Please consider the following points in your presentation:

- Country organization for nuclear security
- Responsibilities of the organization
- Conventions signed by your country
- Plans to improve security
- Estimated inventory of nuclear materials and / or radioactive sources
- Facilities to be protected
- Cooperative activities with other countries or international organization
- Current needs and assistance required
- Issues and concerns
